- Concern to environment and addressing the occupational health and safety needs of personnel.
- Enhance customer satisfaction.
- Provides relevant information on the quality, health, safety and environment policy to the public

TSE (TREATED SEWAGE EFFLUENT)

It is one of the most dry and arid regions in the world which is facing inconceivable challenges in protecting fresh water for domestic, agriculture and industrial uses. Thus, reusing treated sewage effluent (TSE) will be essential to overcome the water scarcity in this country.

The filling station for TSE at the Doha West plant can fill up to 20 tankers simultaneously with a capacity of 20 cubic metres of treated water. It takes about 12 minutes to fill a tanker.

The plant can fill up to 40 tankers per hour, 960 tankers per day and more than 350,000 tankers per annum. The Doha West plant produces 275,000 cubic metres of TSE per day and in 2020 it produced approximately 100 mn cubic metres treated water.

SPECIFICATIONS

- Primary treatment by StepScreen and grit removal
- Activated sludge secondary treatment
- Treated water is sent to agriculture in the farms located in the middle of the desert
- Treated water is sent to Doha City for irrigation of green areas
- Treated water is injected into the ground to recharge the aquifer

SEWAGE WATER SERVICES

Shalimar trading and transport company has its own wide range of sewage water tanker services, using 5000-6000 gallon capacity high pressure suction tankers and trailers with higher capacity for collecting and disposing the sewage water at the government approved dumping sites. Companies that generate liquid waste require a convenient, cost-effective and environmentally friendly way to dispose of these substances.

SPECIFICATIONS

- High pressure jetting machines
- High pressure vacuum super suckers for tank cleaning
- Monohole cleaning and pipeline cleaning
- Tankers and trailers for sewage, oil, chemical waste and rain water
- 5700 and 4500 gallon capacity tanker
- All tankers are vacuum tanker (compressor type)
- Most of our vehicles are brand new

DOMESTIC, NON DOMESTIC GARBAGE SERVICES

Shalimar trading and transport company offers a variety of permanent and temporary services to industrial as well as domestic clients throughout Qatar. Using the industry's largest collection of waste skips, hook loaders, waste bins and stationary compactors. Our safe and friendly drivers provide clean and dependable waste collection, while our professional customer service staff is trained and standing by to answer 24 hours your service-related questions. There is no system of segregation of organic, inorganic and recyclable wastes at the household level. To find a solution for this Shalimar provides door-to-door collection waste on call basis and on a regular basis.

INDUSTRIAL WASTE COLLECTION

As Qatar's largest waste services organization, STTC has the equipment, manpower and expertise to provide dependable, cost-effective solutions to manage industrial waste streams for all types of industry, ranging from local plants to the largest multi-state manufacturing and refining facilities.

SPECIFICATIONS

- Single and double skip loaders (non-domestic waste)
- Hook loaders and stationary compactor transportation
- Compactor vehicles for domestic waste transportation
- Containers- 7 m³, 20 m³, 1100Ltr, 3tr, 2401Ltr 120 ltr & custom size for waste collection

SKIP LOADER SERVICES

Our fleet includes a number of Skip loaders that collect and dispose waste materials. The waste boxes are ideal for transportation and disposal of wide range of waste materials including but not limited to rags, paper, plastics, wood and metal debris. These boxes are ideal for deployment in construction sites, mall premises etc. Skips are also used for various cleaning-out jobs that need much material to be taken away, and in areas producing large quantities of scrap metal. The material in the skip may be taken to a landfill, recycled or recovered/disposed of in some other way.

STATIONARY COMPACTOR SERVICES

Stationary Compactors are designed to meet the needs of every type of facility where waste or recyclables are generated. The compactor itself is separate from the compaction container. The container is removed and hauled to the landfill where it is emptied, while the compactor remains onsite. These compactors are all available
